SUMMARY

Software Engineer with hands-on experience in designing and deploying scalable full-stack applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and SDLC, with proven expertise in building secure RESTful APIs, JWT-based authentication, and cloud-native solutions on AWS. Experienced in Docker, DevSecOps practices, and cybersecurity fundamentals, bringing a security-first mindset to modern software development.

TECHNICAL SKILLS

Languages: Python, JavaScript, Java (Basics),
Backend: Node.js, Express.js, REST APIs
Frontend: React.js, HTML, CSS, Tailwind
Tools: Git/GitHub, Linux, Docker, Postman
Cloud: AWS (EC2, S3, ELB, Lambda, Route53)
Core Skills: System Design, SDLC, DSA, OOPS, Microservices Architecture
Database: MySQL, MongoDB

PROJECTS

Secure Document Wallet (DigiLocker-Inspired)

- Developed secure document handling system with encryption, role-based access, and audit logs.
- Implemented OCR and QR verification using OpenCV; designed scalable APIs for 1,000+ documents.

Market360 — MERN Affiliate Platform

- Built MERN application with product search, affiliate integrations, and optimized backend APIs improving search latency.

EXPERIENCE

Software Developer — Tecmetaverse
Nov 2024 – Apr 2025

- Developed and deployed scalable MERN stack applications using Node.js, Express.js, React.js, and MongoDB, supporting e-commerce and real estate platforms with 100+ active users.
- Designed and implemented secure RESTful APIs with JWT-based authentication, role-based access control, and CRUD operations, improving backend response time and maintainability.
- Implemented performance-optimized frontend features and backend services, improving page load time by 20% and integrating email automation, database persistence, and third-party APIs.

Cybersecurity Engineer Intern — Cyient
Jul 2024 – Oct 2024

- Built a MERN application to track Android Security Bulletin updates and automate notifications.
- Developed internal security scripts using Nmap, Shodan, and Linux utilities.

Ethical Hacking and Cybersecurity Intern — Cyberdosti
May 2024 – Jul 2024

- Practiced Python scripting using Scapy for network scanning, and packet analysis.
- Performed web scraping using BeautifulSoup to extract and process structured data from web pages.
- Conducted packet analysis to understand network traffic and protocol behavior.
- Gained foundational knowledge of computer networking and network penetration testing concepts.

Education

Indira College of Engineering & Management, Pune — 08/2019 – 04/2023
Bachelor of Engineering*, CGPA 7.91*

CDAC, Thiruvananthapuram — 09/2023 – 02/2024
PGD Cyber Security & Forensics, 68.38%

CERTIFICATIONS

- DevSecOps Fundamentals
- DevSecOps Advanced (Cloud Security, API Security, Threat Modeling)
