Summary

Backend Software Engineer with 1.5+ years of experience designing and shipping production-grade real-time systems using Node.js, Express, WebSockets, MongoDB, and PostgreSQL. Seeking a Backend Software Engineer role to apply expertise in distributed systems, REST API design, AWS deployment, Docker-based CI/CD, and OWASP-aligned secure architecture toward building reliable, high-throughput services at scale.

Experience

Yash Computers

Apr 2025 – Present

Software Developer

Pune, India

- Accelerated backend response time by 20% through targeted query optimization and efficient database indexing.
- Slashed deployment time by 10% by rolling out Docker-based CI/CD workflows.
- Streamlined queries across MongoDB and PostgreSQL, boosting data retrieval speed by 25%.
- Delivered real-time features that raised user engagement by 15% via faster updates and reduced latency.

Tecmetaverse

Nov 2024 – Apr 2025

Software Developer

Pune, India

- Architected scalable MERN stack applications with JWT-based authentication and secure REST APIs.
- Deployed cloud-native services on AWS EC2 and S3, ensuring high availability and fault tolerance.
- Restructured backend services, achieving a 20% gain in overall application performance.
- Contributed to production-grade e-commerce and real-estate platforms serving live user traffic.

Cyient

Jul 2024 – Oct 2024

Cybersecurity Engineer Intern

Bengaluru, India

- Automated Android OS patch analysis in Python, cutting outdated OS exposure by 25–30%.
- Engineered a penetration testing tool combining Nmap and LinEnum, lifting testing efficiency by ~15%.
- Authored secure coding guidelines for C++ applications aligned with industry standards.
- Conducted rail network security research in accordance with IEC 62443.

Projects

LinePe – Real-Time Chat Application | React, Node.js, Express.js, Socket.IO, MongoDB, PostgreSQL, Redis

- Designed a distributed chat system handling concurrent users with low-latency messaging via WebSockets and Socket.IO.
- Built 15+ RESTful APIs with optimized response times and JWT-based authentication workflows.
- Implemented event-driven message lifecycle tracking (sent, delivered, read) to strengthen delivery reliability.
- Integrated Redis caching and BullMQ queues, reducing database load and streamlining async task processing.
- Containerized services with Docker; provisioned infrastructure for horizontal scaling via Kubernetes.

Market360 – Affiliate Platform | React, Node.js, Express.js, MongoDB, Redis

- Constructed a data pipeline to normalize and manage large product datasets ingested from multiple marketplaces.
- Introduced filtering, deduplication, and affiliate tracking systems, improving deal quality and analytics visibility.
- Scheduled background jobs to automate deal synchronization, keeping marketplace data consistently up to date.

Technical Skills

Languages & Frameworks: JavaScript, Node.js, Express.js, SQL

Databases & Caching: MongoDB, PostgreSQL, Redis

Tools & Platforms: Docker, AWS (EC2, S3), BullMQ, Cloudinary, Git, GitHub, Postman, REST APIs

Concepts: System Design, Distributed Systems, WebSockets, Authentication, OWASP Top 10, CI/CD

AI Tools: Claude Code, Codex, Antigravity

Certifications

CDAC, Thiruvananthapuram

Sep 2023 – Feb 2024

PG Diploma in Cyber Security & Forensics; Score: 68.38%

Education

Indira College of Engineering & Management, Pune

Aug 2019 – Apr 2023

Bachelor of Engineering; CGPA: 7.91/10
